15-MINUTE INVESTOR EDITION

WHERE STUDENTS SIMULATE REALITY — ON REAL QUANTUM HARDWARE

Building Egypt's Quantum Future Today.

A student-led lab where undergraduates run genuine quantum processors through the cloud. **No cleanroom. No \$10M build-out.** One \$50,000 seed ignites a three-year engine — 200 quantum-fluent graduates, publishable research, and the region's first student quantum hub.

\$50,000

practical quantum labs in Egyptian universities. The first-mover seat is empty

2^300

states a 300-qubit machine explores at once — students will run it via cloud

THE THREE-YEAR CIRCUIT

EACH PHASE OUTPUT IS THE NEXT PHASE INPUT

| PHASE 1) · M 1-6

Foundation

SETUP & TRAINING

- IBM Quantum + AWS Braket access live
- 25 founding members recruited, merit-based
- First Qiskit cohort certified

| PHASE 2) · M 7-18

Operations

RESEARCH & WORKSHOPS

- Research projects on real hardware
- Campus-wide workshops & hackathons
- Industry pilots signed

| PHASE 3) · M 19-36

Sustainability

SCALE & PARTNERSHIP

- Follow-on grants (ASRT · ITIDA · Erasmus+)
- Alumni hiring pipeline revenue
- Regional quantum hub named
